

GREASIL 500

LUBRICANT GREASE WITH LITHIUM

Characteristics

Appearance: Grease
Basic components: Lithium soap, mineral oil, special additives for extremes pressures, anti- corrosion, anti- oxidant and anti-rust additives.

Application

Used in Mechanical industry and more industries.

Properties:

- Good anti-adhesive properties;
- Good anti- wear power;
- Good anti-corrosion and anti- rust power;
- High resistance to cut action;
- High resistance to water action;

Description

Greasil 500 is a high quality multi-purpose grease, characterized by anti- seize properties even in presence of extreme and intermittent pressures with high resistance to cut action and to lubricant parts.

This product is suitable for temperature between -30 °C and 125 °C, highpoint at 140 °C.

The new manufacturing process and peculiar base and additives used, give to Greasil 500 higher properties in comparison to common greases with lithium. Greasil 500 has a strong mechanical stability. Suitable when normal greases are not appropriate to contain adequately the wear of work surfaces and it has good EP (Extreme Pressure) characteristics.

Greasil 500 is particularly suitable for lubrication of heavy machineries in iron, steel and extractive industry. It is also suitable for machineries used in the movement of the ground, trucks etc.. that are subject to shock load or functioning to lower temperature.

Packaging

Pots net weight 900 gr.
Product Code 16070/01
