Description

STARTER APRIMAGLIA is used to open up the dried-in areas of the screen caused by the ink drying. Its very quick and effective action permits reprinting at once avoiding, in this way, the harmful wipe of the stencil with a rag soaked in solvents.

Easy to use, spray a thin film on the closed meshes and the screen is opened again. Thanks to its special formulation, STARTER APRIMAGLIA can be used with all kinds of inks, except for thick films drying by oxidation or catalysis; its activating power is immediate.

Suitable for plastisol inks and water based inks.
